

propatech® VCI

Noxy Lillo and Noxy B50

To solve problems caused by:

Corrosion

Oxydation

Protection grows with movement!

PROPATECH VCI NOXY: the integrators with the **PROPATECH VCI** technology inside!

Propagroup offers a range of efficient oscillating diffusers suitable to be used in combination with the other products included in the **PROPATECH VCI** anti-corrosion range for the ideal protection of your goods.

PROPATECH VCI NOXY LILLO

Thanks to its special patented spring-system, **PROPATECH VCI NOXY LILLO** permits the VCI molecules to quickly and constantly spread within your packaging.

The **PROPATECH VCI NOXY LILLO** diffuser is easily applied inside the container and is activated several hours prior to the departure. As soon as it is activated, the VCI protective molecules will start to be diffused until the environment is saturated.

PROPATECH VCI NOXY LILLO will remain active until it reaches its destination and, every time the transport vehicle moves, it will emit a new active protective substance. .

PROPATECH VCI NOXY LILLO can be activated and deactivated several times: making it economical as well as effective.

ACTIVE

PROPATECH VCI NOXY B50

The new high-efficiency diffuser, **PROPATECH VCI NOXY B50**, has been designed to be housed in reduced spaces. Thanks to its structure and its repositioning system, it easily suits to any type of packaging and will protect your goods for a very long time.

The features of **PROPATECH VCI NOXY** diffusers make them particularly suitable for integrating and enhancing the anti-corrosive action of the **PROPATECH VCI** products.

PROPATECH VCI NOXY will be able to diffuse efficiently also managing to reach hidden points, which are normally difficult to protect, during the entire voyage.

They are the ideal solution to be especially used in bulk packaging intended for long distances and storage, also in critical climatic conditions.

PROPATECH VCI NOXY diffusers provide incomparable, intense and long-lasting protection.

PROPATECH VCI NOXY... ONLY CONCENTRATED PROTECTION WITHOUT THE DISADVANTAGE OF THE POWDER!
