

stirofilm

To solve problems caused by:

Atmospheric agents

Compressions and rubbings

Stacking

Ultra high strength!

STIROFILM is a highly technical multilayer coextruded film. Thanks to special extrusion techniques and a successful formulated mixture of latest-generation polyolefin resins, **STIROFILM** has got amazing mechanical strength characteristics and resistance to tears and perforation. Suitable for covering and lining transport and/or storage containers, it is extremely resistant in case of stacked crates. Moreover it is highly efficient in case of rubbing which frequently happen during handling.

Covering crates or boxes with **STIROFILM** assures an excellent protection degree against weather, UV rays until 24 months and frequent handling operations.

Despite its considerable strength, **STIROFILM** is soft and absolutely safe during its use: it can thus advantageously replace sheet-metals and/or stiff materials commonly used to cover wooden crates and boxes or as internal or external wall. In addition, **STIROFILM** softness makes its positioning easier and quicker. **STIROFILM** does not rust and will provide a better and safer protection for your packing container right up to its arrival at destination, even after long periods of storage.

STIROFILM is extremely easy to use: a simple stapler is ENOUGH to secure it to a wooden crate. In case of need, **STIROFILM** can also be heat-welded by means of a polyethylene impulse welding machine.

STIROFILM is completely recyclable as a common plastic material.

stirofilm

STIROFILM can be used as an excellent barrier to humidity contained in the air and it is totally waterproof. Excellent for outdoor storage.

Special treatments, including the fire-retardant, can be also applied onto the **STIROFILM**.

STIROFILM can be supplied in rolls up to 8 metres high. When required it is also available in sheets.

STIROFILM is a strong and safe material able to advantageously solve many problems connected to transport and storage of your goods.
