Temperature indicators

The simple to use indicators offer precise monitoring of time since activation or length of a temperature breach. Timestrip indicators are activated by a simple squeeze of button. All the indicators offer activation indicating, letting you see the Timestrip indicators are on and working. The modern design allows users to gather data with a glance as the white indicator windows fill with colour. Adhesive backing on the small indicators make it simple to attach to the product, shipment or item to be monitored.

Timestrip irreversible temperature indicators monitor the length of temperature breaches after activation. Stocked temperature indicators monitor from -20°C to 38°C. There are two specialty lines of temperature monitoring labels that have been created for the Food and Blood Industries:

- **Timestrip Food Temp** indicators monitor temperatures from 3°C - 10°C. The Timestrip Seafood 3°C has been developed to comply with the FDA regulations on reduced oxygen packaging.
- **Timestrip Blood Temp** indicators monitor the temperature of blood products during transport and storage. The Blood Temp 10 is a FDA 510(k) approved medical device for 10°C monitoring of blood bag transportation.

Timestrip indicators can be grouped into four main market sectors:

- **Food** - Time-Temperature indicators (TTIs) that have been specifically developed for food shipping and storage.
- **Healthcare** - Temperature indicators for the healthcare and blood product industries.
- **Life Sciences** - Temperature indicators curated for the life science industry.
- **Pharmaceutical** - Time and Temperature indicators for the pharmaceutical industry.

**PRODUCT RANGE:**

**Timestrip PLUS**
Monitoring a range of ascending temperature thresholds from -20°C to 38°C

**Timestrip Blood Temp**
Monitoring 6°C and 10°C
The Blood Temp 10 indicator is FDA approved

**Timestrip Food Temp**
Perfect for seafood, shellfish and food shipping.
Monitoring 3°C, 5°C, 8°C & 10°C

**Timestrip Complete Card**
Simultaneously monitors ascending and descending breaches on a Convenient carrying card.
Perfect for 2 -8 °C cold chain monitoring.

FOOD
Timestrip Food TTIs are a simple solution for food safety compliance and cold chain temperature monitoring. The user friendly and cost effective indicators are used worldwide by a number of leading brands in food services and shipping.
Timestrip even developed a 3°C TTI with the FDA regulations for C. bot. These irreversible temperature indicators can be used for proof of temperature breach in reduced oxygen packaging shipments.

Seafood
developed with the FDA to control for the hazard of C. bot growth and toxin formation in reduced oxygen packaged (ROP) seafood

LIFE SCIENCES
It is a range of products for the life sciences sector, offering invaluable visual aids to medical staff and patients. Timestrip® indicators clearly indicate whether a product is within its date, when a diagnostics test results are ready to be read and/or temperature parameters have been kept.
Timestrip indicators are a simple solution to help healthcare workers. The user friendly indicators show how long a temperature controlled shipment was exposed to unsafe temperatures or how much time is left before a results can be read.

PHARMACEUTICAL INDUSTRY
It is a range of products for the medical and pharmaceutical sectors, offering invaluable visual aids to doctors, patients and healthcare workers. Timestrip® indicators clearly indicate whether a product is within its date and/or temperature parameters and therefore acceptable to use.
Timestrip indicators are a simple solution to help patients and healthcare workers. The user friendly and cost effective indicators visually show how long a temperature controlled drug shipment was exposed to unsafe temperatures or how much time is left before a pharma product is out of date.
